

WORLD ENVIRONMENT DAY TIME CAPSULE

The Time Capsule placed beneath this plaque in June 1994 contains letters and objects linked to the many environmental concerns felt by the children of today.

Letters from the adults apologise for the overcrowding, pollution and resource scarcity we fear we will leave behind. They also state our commitment to overcome these problems through individual and concerted action, so that all species may share life together on a safe and sustainable planet.

Our goal is to make the apology unnecessary by the time the capsule is opened on 5th June 2044.

***It is better to light a candle than
to curse the darkness***
